Bosch's GSL 2 laser checks floor flatness

Bosch unveils the GSL 2 Surface Laser, which continuously checks floor levels and flatness. The GSL 2 can scan an entire floor within minutes and never misses an uneven spot, according to the company. A target plate and RC 2 remote control with a working range of 60 feet allow users to remain close to uneven spots for marking and examination. *For details, circle 198 on the Reader Inquiry Card.*

▲ Custom Building Products

Custom Building Products launches CustomTech line

Custom Building Product has introduced its CustomTech line of surface preparation products. Led by flagship product Silk, a feathering and patching compound, CustomTech is engineered for flooring applications including vinyl, wood, laminate and carpet. GenPatch, a fast-setting calcium aluminate compound designed to provide a smooth finish on interior and exterior subfloors, is also available. *For details, circle 200 on the Reader Inquiry Card.*

▶ QEP Co. Inc.

QEP adds two new Roberts flooring cutters

QEP Co. Inc. has taken the wraps off of the Roberts 10-60 9 In. Flooring Cutter and Roberts 10-64 13 In. PRO Flooring Cutter. The Roberts 10-60 cutter (pictured) features a heavy-duty steel "T" base and "V" support and plank support arm to minimize plank movement. The tool is designed to cut laminate and engineered wood planks. *For details, circle 196 on the Reader Inquiry Card.*

▼ Tile Redi

Tile Redi's Redi Trench for use with Redi Base

Tile Redi offers Redi Trench, which can be used with any size Redi Base, and can be plank-pitched, molded-in trench, put in any trench location or drain location in trench, with choice of tileable or grate top. Tile Redi's shower pans and tile-ready products are manufactured as pre-formed, one-piece shower modules. *For details, circle 192 on the Reader Inquiry Card.*

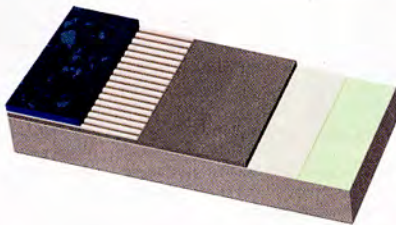

▼ nora systems

Five components in nora's new install system

nora systems introduces the nora pro install system, a comprehensive flooring installation system designed specifically for nora rubber flooring. The nora system features five components: a nora membrane, primer, leveler, patch and adhesive. Not all projects will require the use of every component; however, all the parts are readily available for use. *For details, circle 194 on the Reader Inquiry Card.*

Parex USA Inc. ▲

Parex's Merkrete ProGrout can be used on walls, floors
